DOLPHIN WALL MOUNTED DOC M WC PAN AND SEAT

INSTRUCTION MANUAL

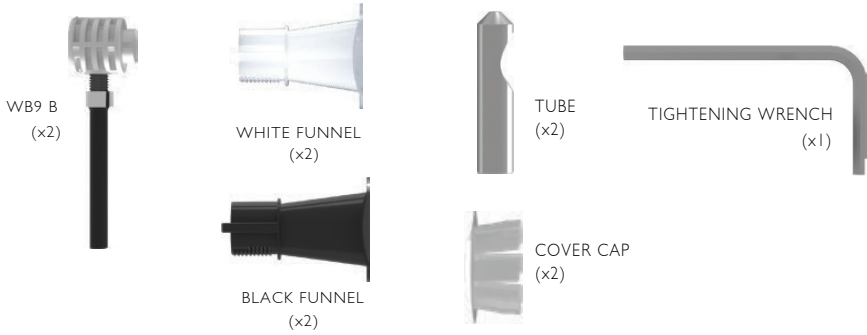

May 2024

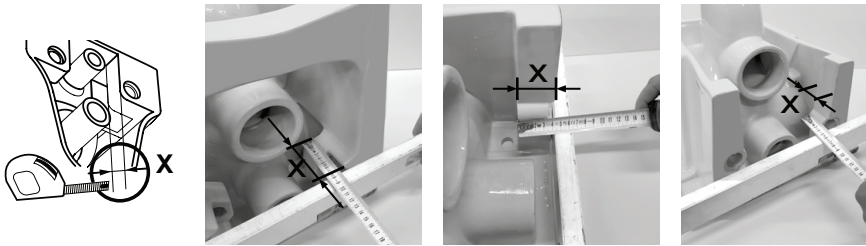

D
DOLPHIN

INSTALL DIAGRAM

THIS PACKAGE CONTAINS

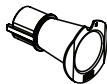

Step 1

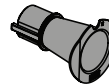

Measure the thickness of the ceramic 'X' from the support point of the WB9 B on the ceramic to the outermost point of the sanitary ware which will rest on the wall.

Step 2

$34 \text{ mm} \leq X \leq 41 \text{ mm}$

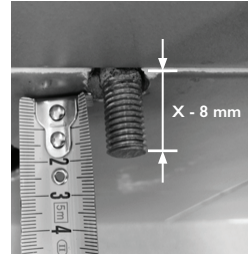

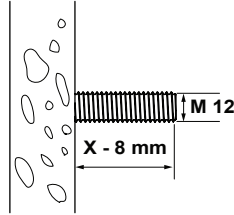

$42 \text{ mm} \leq X \leq 47 \text{ mm}$

Choose the correct funnels based on the thickness 'X' of the ceramic: white for X between 34 and 41 mm, black for X between 42 and 47 mm.

INSTALL DIAGRAM

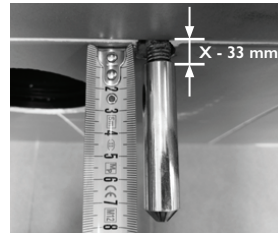

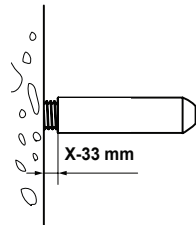

Step 3

Check that the protrusion of the M12 threaded bars from the wall is equal to the thickness of the ceramic 'X' - 8 mm.

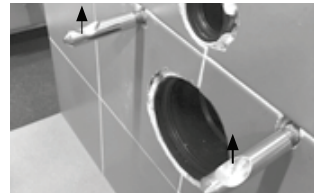

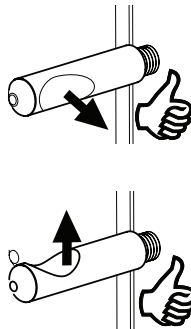

Step 4

Screw the tube to the correct size, equal to the thickness of the ceramic 'X' - 33 mm.

Step 5

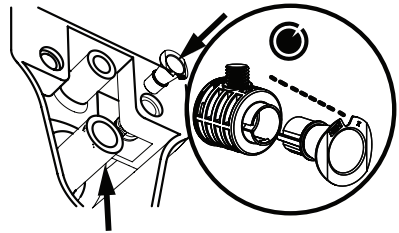

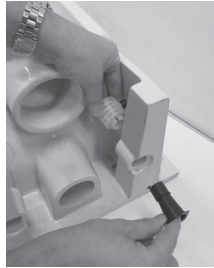

Orient the cavities of the sleeves laterally towards the outside. If there are no lateral holes on the sanitary fixture, orient the cavities of the sleeves

INSTALL DIAGRAM

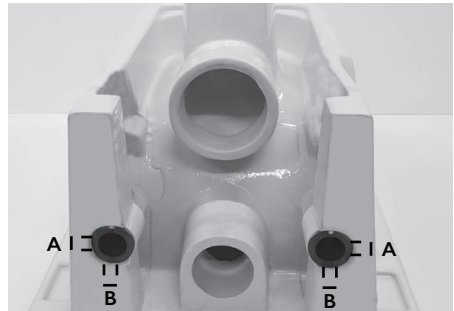

Step 6

Insert the two WB9 B fasteners onto the ceramic and attach the chosen funnels from step 2.

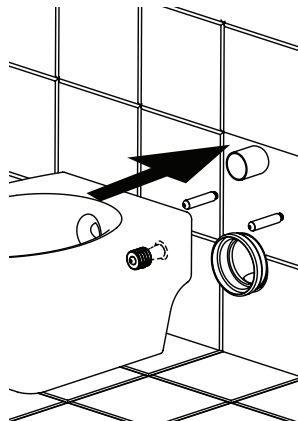

Step 7

Rotate the WB9 B fasteners laterally until the threaded insert is accessible through the lateral hole of the sanitary fixture (A). If the sanitary fixture does not have lateral holes, rotate the WB9 B until the threaded insert is facing upwards (B).

Step 8

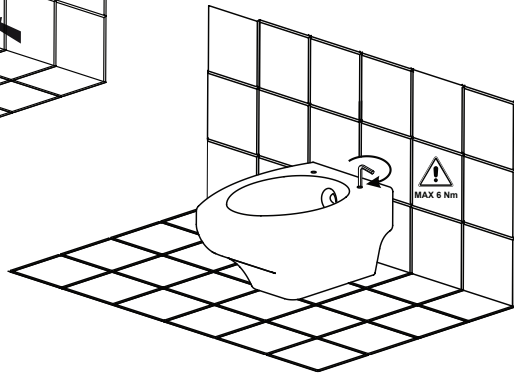

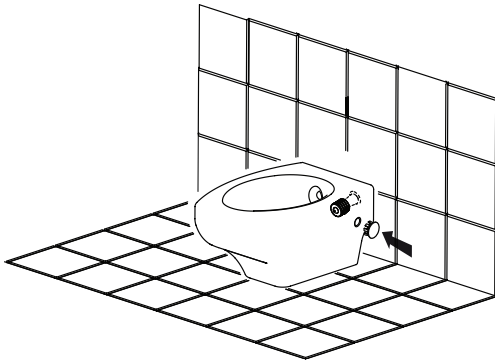

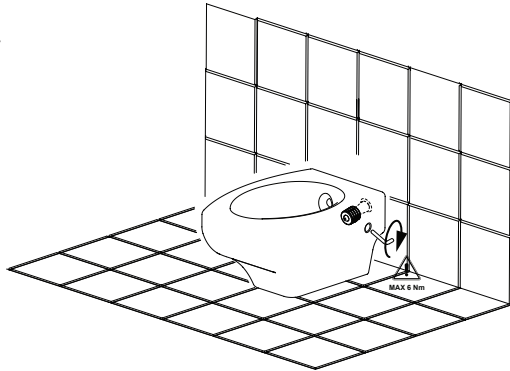

Insert the sanitary fixture, ensuring that the sleeves are inside the funnels.

INSTALL DIAGRAM

Step 9

Screw in the two WB9 B devices by inserting the tightening key into the lateral holes. Once tightened, insert the two hole cover caps. (Max 6 Nm). If there are no lateral holes, screw in the two WB9 B devices from above. (Max 6 Nm).
